

Leading the Way in Powder for Additive Manufacturing

Uddeholm Additive Manufacturing Powders Offer Mold Makers and Tool Users Never Before Seen Tooling Flexibility

FOR IMMEDIATE RELEASE

Elgin, IL., Feb 21, 2018 – So far there have been limited materials to choose from when it comes to printing metal parts and they have mostly been developed to be easy to print, not due to demands from the applications. Uddeholm is now pleased to announce that we have launched Corrax AM powder which has been specifically designed with the needs of plastic injection molders in mind. By using Corrax powder in additive manufacturing applications, possibilities such as creating conformal cooling channels can now be explored to reduce cycle times.

As a new and flexible way to produce parts, additive manufacturing offers exciting possibilities for optimizing design and properties. Tooling is an optimal application for additive manufacturing with high demands, short run series and an ever increasing demand for shorter lead times.

“Uddeholm has long been the leader in developing and bringing to market tool steels and mold materials which allow our customers to take on the challenges of more demanding resins and part designs,” says Kevin Rochford, Vice President of Sales, Uddeholm USA. “For us at Uddeholm, it is the natural evolution that we should lead the market in developing additive manufacturing powder for plastic applications.”

Uddeholm at NPE 2018

Uddeholm will be exhibiting at the NPE 2018 Plastics Show at the Orange County Convention Center in Orlando, Florida. Featured at the booth, will be our complete line of plastic tooling solutions as well as our North American introduction of Corrax AM Additive Manufacturing Powder specifically designed for additive manufacturing of tooling components. Stop by South Hall, Booth S31061 from May 7-11, 2018 to learn how Uddeholm can provide you with complete solutions for your tooling needs.

About Uddeholm

Since 1668, we have been providing a wide range of innovative cutting-edge solutions for our customers in demanding segments. Our dedicated employees work in over ninety countries and together we deliver improved competitiveness to clients worldwide. Welcome to Uddeholm, #1 in high-performance tool steel.
